

Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value:

Individuals and interactions
over processes and tools

Working software
over comprehensive documentation

Customer collaboration
over contract negotiation

Responding to change
over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

Manifesto for Agile Teaching

We are uncovering better ways of teaching by doing it and helping others do it. Through this work we have come to value:

Individuals and interactions
over lesson plans and teaching tools

Learning effects
over learning documentation

Teaching and Learning collaboration
over teacher and learner roles

Responding to the individual situation
over following a plan

That is, while there is value in the items on the right, we value the items on the left more.
